Thanks! vs Runs very well in WinXP, but in Win7x64 it requires admin privileges to run. Hence refuses to autostart in any account that has no admin rights. Tried to put the exe file in a separate folder in drive D, but still no luck. My USB is in safety now! Thanks! great program, saved my life more than once! Excellent, a must have tool... Best Utility ever! just wondering if it can blocking malicious kind of svchost.exe. Btwy good job for the FREE stuff. Once download and install USB Virus Remover on computer, your system wouldn't be infected with USB autorun virus/worm/trojan from USB any more. USB Virus Remover provide 100% antivirus protection for USB drive, any USB drives inserted into computer, USB Virus killer will check the files in it before opening the drive. All the viruses will be removed by USB Virus Scan, none of virus will be ignored by the antivirus tool. This can make your computer more safe when using USB key and flash disk. USB memory, Mobile phone, iPod shuffle, iPod touch, iPhone, Mp3 player etc are supported. Autorun viruses are executed from USB removable drives that connect to your computer, using the autorun function of Windows in order to execute malicious code on the host machine, with consequences related to system spying, data theft and destruction. Autorun Shortcut USB Virus Remover is designed to help you prevent such actions from taking place and protect your system. Providing a forthright interface, this application can scan your connected removable drives to detect and remove the 'autorun.inf' file that a virus might have created, clean the drive and unhide all the files that are hidden. The GUI comprises all the options within a single window. You start by checking the 'See Directory Content' option, which reveals a console-based window that requires you to enter the drive letter, initiates the scanning procedure and then returns the drive label, serial number and a list of all files that are not visible. Autorun.inf is a hidden file by default and therefore, it is advisable that you use the application's dedicated function to unhide it prior to proceeding to the cleaning operation. You can easily and quickly unweil all the hidden files and instruct the application to start finding and removing files that viruses might have generated. With the push of a button, the 'autorun.inf' file can be erased from the target drive, keeping it free from such infections. Autorun Shortcut USB Virus Remover is actually a GUI version of a console-based application named Autorun. .lnk,shortcut,etc usb virus remover, which has the same main functionality, namely to avoid the contamination of your USB device and PC due to the actions of the Autorun virus. Both can assist you in deactivating the autorun feature for connected removable drives, but Autorun Shortcut USB Virus Remover might be more appealing to users, thanks to the ease of use. Please note that neither can be used as a permanent security solution to safeguard your system. Autorun File Remover Portable is an utility that enables you to detect and remove autorun files that are located on flash drives. Autorun is a Windows feature that eases the day of everyone but in some cases it's best to be without it. Because of it, you can easily get infected by autorun viruses that are let loose into your system the moment AutoRun opens the infected file. These files are found on USB drives and CD/DVD discs. Autorun File Remover Portable is a tool that you can use to remove these viruses from you flash drives in a simple manner. The application quickly scans the newly inserted drive and immediately takes action. Being the portable version of Autorun File Remover, the utility doesn't need any installation and does not affect your system registry. This means that you can take Autorun File Remover Portable anywhere with you and use it as an on the fly solution. The application displays a comprehensive interface with no complex settings or hidden menus which makes it a great tool for urgent situations. With this application you can remove malicious components, that are usually very difficult to remove. With Autorun File Remover Portable you can perform a thorough analysis threat and have the utility display all the detected files inside the main window of the application. To remove the files takes just one click. Autorun File Remover Portable is one of those applications that is meant to do the job but you need to be careful what you delete as the application can detect as harmful applications that are not. Autorun viruses are among the most dangerous types there are. They move fast and in most cases pass undetected from antivirus applications. Luckily Autorun File Remover Portable is an application that is capable of dealing with these kinds of threats. Does your antivirus can't remove the autorun& autorun.inf virus in your system or USB storage device completely? Or even they can't detect the virus? Autorun& autorun.inf virus is a new kind of virus/trojan, most of common antivirus products such as Kaspersky, Nod32, Avast, AVG can do little about this kind of virus/trojan. Autorun Virus Remover uses proactive technology to permanently remove autorun& autorun.inf viruses, also it can block any autorun& autorun.inf viruses trying to infect the system via USB drives(pendrive, external hard disk, iPod, etc). What you need to do is just clicking the scan button of Autorun Virus Remover.
